

AgriNext or Agricultural and rural excellence Incubator and Platform for the Exchange of competencies is an Erasmus+ project that aims to create a learning environment that responds to the skill demand on the job market in the field of agriculture.

## Partners on the Agrinext Project: IES Galileo Galilei and On Projects

The AgriNext project will give a deep vision to the group of students and entrepreneurs related to agricultural TVET, which will facilitate a much more powerful rural development. **The development of the activities already being implemented, as well as those planned for the future, will give a boost to the economy of the agricultural and livestock students trained at our centre**, as well as to the socio-economy of the areas in which they will develop their future activities. Miguel

## AgriNext Team Successfully Tests Training for up-to-date competencies for teachers in multifunctional agriculture

From August 27-29, **the AgriNext partners convened in Karlovac to advance a more flexible education system in agriculture**, tailored to learners' interests and abilities while addressing the evolving needs of the labour market. The event featured a pilot training session for VET (Vocational Education and Training) teachers, designed to empower them to inspire and prepare the next generation of agricultural professionals. As the new school year approaches, it's
